- Special teacher Högstadiet, Stenstorpskolan 2003-2004
- Stuntman Falköping Fx 2000-2004
- IT manager Cami AB 2002-2003

With a versatile background in IT, software development, and project management, combined with a strong foundation in agile methods and information security, I am eager to bring both breadth and depth to new challenges. After recently completing education in information security, full-stack development, and web development, I have gained a solid understanding of various programming languages, including Python and TypeScript. I develop solutions with a strong awareness of user experience (UX).

My experience as a consultant and freelancer has allowed me to work on a wide range of projects, from process automation to coordinating software implementations within production environments. With my skills and experience—particularly in system development, integration, and customization—I can contribute across multiple areas. My time at Good Solutions Sweden AB and Kardex Sweden AB has strengthened my ability to understand customer needs, develop tailored solutions, and ensure successful implementation and user training. In addition, my background in lean production and continuous improvement complements my collaborative and problem-solving approach.

Educations

Full Stack Development	Företagsuniversitetet 2023 – 2025

English – Very good knowledge of both speech and writing. (C1)

German – Limited knowledge.

Serbo-Croatian – Limited knowledge.

Spanish - Very limited knowledge.

Swedish sign language – Very limited knowledge.

Driving license:

A, B(96)

Fun about me

Ingenious already as a child but managed to split my finger. Won third prize in inventor competition in high school. I got the highest score on the aptitude test for the goldsmith education at the high school. Has been beaten bloody in front of a camera, been blown out of a window, and ridden western riding to the left. Sharpened sword for 24 hours, been robbed in Romania, I'm cooler than Joe Labero, was bullied by knights and received standing ovations for filming Romeo and Juliet. Rhymed on Manchego and drove a tractor for ten hours on a motocross track. As well as jumped out of a plane, had a half Caribbean cruise blown away and sneaked on alligators in Florida. Went through a liver transplant with exceptional good results. Had a four month trip celebrating life through 18 countries.
